The Best of dedolight

At unbelievable conditions, brand-NEW, bestsellers, full warranty.

Brand-NEW non-dedolight

dedolight full kits,

ex demo and exhibition, some ex rental, tested, full warranty, unbelievable bargain

Optics and cameras

The incredible Flea Market Collection

with some brand-NEW morsels for the absolutely lowest budgets.

unbeatable prices - only while stocks last

We are happy in our location since 1992, but our growing warehouse will have to be moved to NEW premises. For preparation we need to re-organize and clean out.

Even some of our most wanted and successful tools, because NEW generations will soon be in production. Some absolutely perfect equipment, which has been sitting on our shelves.

Complete production kits ex demo and exhibitions, tested and ready to rumble, with full warranty for the smallest budget.

Some unbelievably useful morsels in our Flea Market offering.

The prices for dedolight are even more attractive here, as we have increased our regular dedolight prices by 15% from September 1, 2022 (after five years of keeping the same prices). That is the equivalent of a 3% price increase per year, but makes this an opportunity that you should not let pass.

LEDZILLA B[®] Bicolor - LED Mini On Board-Light

- Color temperature can be adjusted in a very wide range, from 2700K all the way to 6500K. This light may be adjusted to all ambient light situations.
- Most LED Bicolor lights have only half the light out when set to daylight or tungsten. The Ledzilla Bicolor utilizes an LED array which produces a full 8'W in both daylight and tungsten positions.
- In a Bicolor LED light, the tungsten position is generally 25-30% weaker than in daylight. The multichip light source of the Bicolor Ledzilla utilizes 9 mini-chips arranged in a checkerboard pattern. We use 5 chips in the tungsten position and 4 chips in the daylight position. This results in a nearly equal light output in both daylight and tungsten positions.
- Regardless of the settings of the color temperature, the light output is smoothly dimmable all the way down to full zero, without any 'digital' steps.
- A bayonet attachment allows the interchangeability of the front optical elements with front-end accessories, like the soft box, the China lantern and the soft tube
- All the power options are identical with the options described for the Ledzilla2.
- The Ledzilla Bicolor features perfect color values. In daylight - CRI92, in tungsten setting - CRI97 (TLCI).

DLOBML-BI Ledzilla Bicolor as measured in daylight position 5600K

Distance	Meter	1	2	3	4	5	10
	Feet	3'	6'	9'	12'	15'	30'

TLCI (3200) 97,

TLCI (5600) 96

Length: ca. 57 cm / 22,44"

Weight: 9 kg / 19,8 lb

Set consisting of:

- Lighthead passiv cooling
no fan – no noise
- Ballast DT10BI DMX
- Cable – lighthead + ballast
DPOW10
- AC input cable
- Textile Reflector 5" (1,50 m) – PA5
Incl. 3 Diffusors + pouch

DT10-BI

Bicolor power supply, AC 90-264V /

50-60HZ, Max. Power: 256 VA,

Prot. Class: IP 20

Weight: 2,4 kg / 5.3 lb

THE CLASSIC

THE EXCEPTIONAL OFFER
The Evolution of THE CLASSIC

The DLH4

Continuously improved and expanded functions and accessories.

List Price: 331,00 €

Special Price:

saving ≈ 43%

188,00 €

- The first and only low-voltage dual-lens system, offering unparalleled benefits.
- The most economical solution and, from the very beginning a totally ecological system (green tech).
- Output approximately compares to a traditional 500 Watt Fresnel.
- Extended lifetime of the lamp (for a fraction of the cost), amortizing the light after approximately one year of use.
- Unequalled focusability 1:25 (small Fresnels focus 1:3, huge Fresnels (6K) focus 1:6).
- Light distribution and light character like no traditional fixture.
- Precision light.
- The clean-beam concept without stray light.
- Suitable for highest demands in special effects (Harry Potter, Lord of the Rings, American Beauty, and many more).
- Indestructible in rough, everyday use.
- First patented application of non-spherical lenses.
- Adding an extra focus movement for even higher spot performance.
- Unequalled optical and light-shaping accessories.
- Culminating in the miraculous PARALLEL BEAM INTENSIFIER, opening the gateway to the dedolight Lightstream system.

C2 dedolight Classic Power options

Brand-NEW, full warranty – the Best of the Best

Special Offer valid in combination with purchase of light-head (S)

DT24-1

Electronic power supply, switchable 230/240 Volt. Choose settings 3.400 Kelvin or 3.200 Kelvin, or full dimming.

saving ≈ 44%

List Price: 229,00 €

Special Price: 129,00 €

DIMTA3

Electronic transformer for input 230/240 Volt only. Output for 12 Volt, 100 Watt lamps.

saving ≈ 43%

List Price: 123,00 €

Special Price: 70,00 €

DT12-4

Compact universal power supply. Input adjustable anywhere worldwide. Output for four light heads 12 Volt, 100 Watt.

Color temperature selectable/switchable 3.000/3.200/3.400 Kelvin.

saving ≈ 44%

List Price: 720,00 €

Special Price: 406,90 €

DT24-3

Compact multi-functional power supply, three lights 24 Volt, 150 Watt. AC input selection for worldwide application.

Output switchable 3.000 / 3.200 / 3.400 Kelvin for each output individually.

saving ≈ 44%

List Price: 764,00 €

Special Price: 128,00 €

DLH4

MINI PAINT DEFECTS

dedolight light head NEW with hardly visible paint blemishes

DLH4, the original dedolight light head, 150 W, low voltage. Our worldwide most successful bestseller, awarded by the Oscar Committee of the Academy of Motion Picture Arts and Sciences. Light output approx. equal to a traditional 500 W Fresnel light

Exceptional focus range of 1:20. Normal Fresnel lights only have 1:3

Clean beam, homogenous light distribution, no stray light Precision lighting system now with double non-spherical optic (patented) with additional focus movement for tightest spot and large reach. Here with minimal paint blemishes

**Full function, full warranty, brand NEW equipment
At this price you will never get this light again**

List Price: 331,00 €

Special Price:

saving additional 10%

169,00 €

This is a low-voltage light, working with 24 V DC. For power options, look in this brochure at page 18 and for the accessories, see pages 18 and 25 of this brochure.

Please note:

These very special prices for the power supplies and accessories shown on pages 18 and 25 are only valid in conjunction with an order for these light heads..

THE LONG STORY Of the exceptional Classic dedolight

The classic light was continuously improved and expanded in its functions.

The beginning was the LOW-VOLTAGE DUAL LENS SYSTEM

The most economical solution and also the leader in all ecological aspects (green tech) from the beginning.

- Light output comparable to a traditional 500 Watt Fresnel light.
- Drastically longer lifetime of the lamp at a fraction of the price for high-voltage lamps.
- Thus, the price of the light head amortizes automatically after approximately one year of use.
- Focusability, light distribution and light character unlike anything ever achieved with traditional lights.
- Precision light

- The clean-beam concept without any stray light. Suffices for the highest demands in special effects (Harry Potter, Lord of the Rings, American Beauty, and many more).
- Indestructible, even if in rough everyday use. I once received a light head which was returned from NDR (North German Television) which had been rolled over by an armoured police car. It was flat like a pancake, but it was still putting out light, only it didn't focus very well anymore.

For 40 years now an indispensable companion of thousands of mobile teams worldwide.

Economically, for us, the long lifetime of these lights is a disaster. They simply don't ever break down.

The steps of evolution

- 1 - We changed the design of both lenses and upgraded them to a patented, non-spherical system
- 2 - We added an extra focus movement, which even improves the already exceptional spot performance.
- 3 - We included a light shield inside the light head. Now no longer necessary to use necessary to use lamps with blackened top.

4 - Imager / Projection attachment

Imager/projection attachment

Now even with a movable image plane (like on a view camera). Different variations allow effective, razor-sharp projections from gobos, effect filters and images.

The exceptional Classic dedolight

5 - Creation of further perfectly calculated projection lenses from 185, 150, 85, 60, 50 and now also the miraculous 30 mm lens.

We also have two different zoom lenses. A double-extension tube is part of each projection attachment and allows lighting an entire large wall, but also the smallest detail down to 1 square millimeter. Incredible versatility.

6 – the latest step – THE MIRACLE – development: the PARALLEL BEAM INTENSIFIER.

Our spot performance and the entire optical construction earned us the recognition from the Oscar Committee of the Academy of Motion Picture Arts and Sciences (twice), and we won an Emmy and more.

NOW,

We went one unbelievable step further. We add extra calculated optics, **the parallel beam intensifier DPBA-714**. This adds amazing further intensity – more than 300% extra. **Beyond the already unprecedented spot performance.

Thus, we open the gateway to the unbelievable and revolutionary dedolight Lightstream system, which allows the simultaneous use of multiple reflectors in different sizes, with different reflective surfaces, to efficiently light entire scenes with a minimum of light fixtures.

Not only saving a lot of time and other lighting paraphernalia - also one of the most economical ways to light. Beyond that, it is a unique way to cheat the square law, because reflected light travels a longer way, thus

allowing the talent to move without much noticeable change of intensity.

We have many tutorial and educational videos to show all these functions in great detail, otherwise you would never believe what can be done with these lights.

For a limited time we want to make an exceptional offer.

The Celebration Special Price

Allows you to benefit from these exceptional qualities and all the NEW and unbelievable performance.

We hope to create a deeper understanding for our exceptional, optical benefits, now culminating in the dedolight Lightstream system.

The expectation: once you start the dedolight Lightstream system, you are hooked and realize that this is what you have been waiting for for many years. It is now accessible, and therefore we do not only open the doors to this exceptional system, but also offer an extremely favorable price to make it all possible, even for the smallest teams.

Please take a good look at the hundreds of tutorial videos that we already have on YouTube.

Videos you will find here:

here

dedolight Focusing Low Voltage Lights

Some of us are constantly on the move, be it for NEWS, interviews or documentaries. A life with 'Lighting-on-the-Run'.

For these teams we have always had the best possible choice with our kits called 'The Portable Studio'.

Today, another subject for all of those, who are not constantly 'on-the-run', if you are working in a studio and see the need for high-class precision lighting, like table top tasks with jewelry, cosmetics, electronic equipment or food, everything that needs very special care and a very special glamorous look.

Here is a very attractive offer. This consists of the high precision versatile and creative tools in a complete set.

Accompanied by multi-output power supplies, be it the 3 x 150 Watt DT24-3 power supply, or the 4 x 100 Watt power supply DT12-4.

To make it even more attractive, we add two of our imagers/projection attachments, complete with 85 mm projection lens, perfect to light a sizable background, or to highlight the smallest possible detail (which facet of the diamond do you want to light).

Absolutely stunning precision, as used exclusively for the highest demands in special effects of the 'Harry Potter' Series, or the special effects in the 'Lord of the Ring' movies, the film 'American Beauty', or the fascinating 'Back to the Future' Ride Film shot by Doug Trumbull, and many others.

Today, especially in view of the situation that we all encounter at the moment, an absolutely unique and one-time offer.

We have reserved a particular contingent of these sets which may not be available for long, because this offer is extremely advantageous.

Brand-NEW, full warranty – the Best of the Best

Version 1:	Description	Unit price:
1x DLH4	Light head, 100 W / 150 W tungsten, low voltage	331,00 €

The dedolight projection attachment employs interchangeable lenses with different focal lengths to produce various angles and image sizes similar to the way lenses are used on a camera. 60 mm or 85 mm lenses for projecting a larger image.

The 85 mm lens can project an image with a diameter of 135 cm (53 ") at a distance of 2 m (6 - 1/2 ').

The 185 mm lens can project an image with the same diameter (135 cm / 53 ") at a distance of 5 m (16 ').

Possibly light signs of use (from our exhibition).

DPX - Extension tube
Extends the projection attachment by 60 - 100 mm.

DLHM4-300 Tungsten light head, 230 V

The self-contained dedolight DLHM4-300 works with an integrated electronic power supply combining:

- NEW dedolight Aspherics2 optics

- Drastically improved light output
- 24V / 150W integrated electronic power supply
- Manually dimmable
- Including two lamps 24V/150W

Version for Europe: Input 230V

DLHM4-300, light head, black

DLHM4-300E - used lamp in light head inserted

No. 505	Description
4x DLHM4-300E	Light head, 24 V / 150 W tungsten, with built-in transformer and 4 m (13.1') AC power cable
4x	used lamp
4x DST	dedolight stand
1x DPFS	Imager framing shutter blade set
1x DPI	Imager projection attachment with 85 mm lens
1x DPGH	Steel gobo holder (size 'M')
1x DFH	Gel filter holder
1x DGMD	Gel filter set, mixed diffusion (fits Classic Series filter holder)
1x DGW	Gel filter set, warm tone (fits Classic Series filter holder)
1x DV6B	Vacuum mount, 152 mm (6") diameter suction cup
2x CLAMP1	dedolight clamp
2x DH2	Wall holder
1x DSCK	Scrim kit (includes all Classic Series scrims)
1x DCHDM4	Transport hard case

This SPS5 5-light kit is worldwide one of our most successful multi-light kits with 3 focusing lights, 2 softlights, universally perfect for interviews, documentation as a multi-purpose travel kit. Long-lasting (practically indestructible).

The absolute favorite for the traveling mobile small team

No. 512	Description
2 x DLH1x150S	soft light head, 150W tungsten
2 x HTP150S	high temperature resistant pouch
2 x DT24-1E	power supply, 150 W/24 V
1 x DSBSXS	dedoflex mini soft box
1 x DLGRIDXS	mini grid
1 x DSBS	dedoflex soft box, small
1 x DLGRIDS	grid, small
3 x DLHM4-300E	light head with built-in transformer
3 x DPLS	light shield ring
3 x DBD8	barn doors
3 x DFH	filter holder
1 x DGW	gel filter, warm tone
1 x DGMB	gel filter set, mixed blue
1 x DGMD	gel filter set, mixed diffusion
1 x DGCOL	gel filter, color effect
1 x DSCK	scrim set
1 x DSCP	scrim pouch
1 x DP1.1	projection Attachment/Imager
1 x DPGH	gobo holder
1 x DPGSET	gobo set
1 x CLAMP1	clamp
1 x DSTFX	flexible stand extension
5 x DST	stand
2 x DLBOX	plastic box
10 x DL150-NB	halogen lamp 150 W/24 V, clear
1 x DSC2	soft case

Brand-NEW, full warranty

dedolight® DLH400D

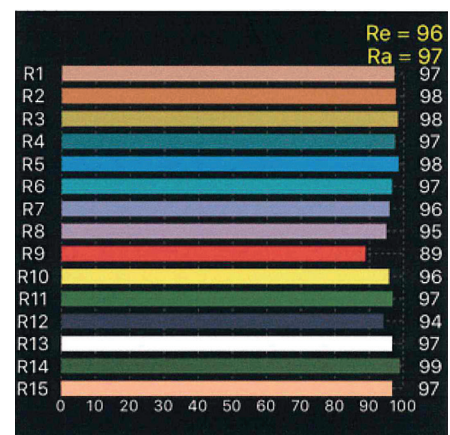

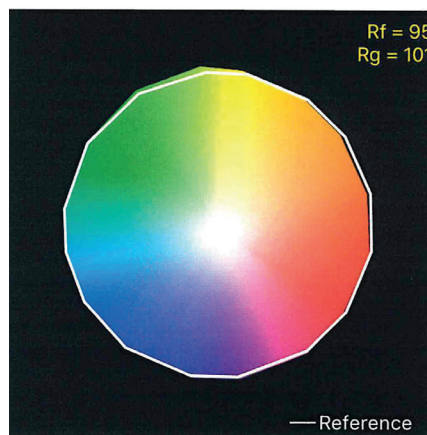

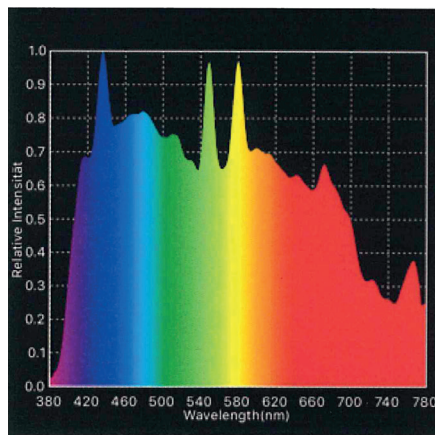

The most capable precision light ever built.

- Twice awarded by the Oscar Committee
- Highest focus range (flood / spot 50° - 4°)
- Highest dimming range (including boost – without color change)
- Perfect light AND color distribution, based on patented double-aspherical optics
- Now, finally with metal halide lamps, with the cleanest possible color spectrum

The Perfect Lamp

According to our past experience metal halide lamps (HMI) had serious problems with color rendition. Each chemical element produced its narrow-band color, and in between there were serious gaps which affected skin tone rendition. Our NEW lamps have excellent color distribution.

CRI (RE – R1-R15)	98
TLCI	99,8
TM30-15 RF	98
TM30-15	RG

The amazing fact is that these lamps keep their high-color quality all throughout their entire lifetime.

Ultra-violet

Practically all discharge lamps emit a high content of ultraviolet, where especially the short wave (UVC) presents a serious health hazard for skin cancer and eye damage.

Our lamps are so-called UV-stop lamps, but that is only part of the story. We are proud to have on our front lens an integrated dichroic UV-cut filter which lowers the UV content practically to zero.

Most other manufacturers of metal halide lighting equipment have a UV content twenty times!!! Higher than we have. Our UV content with our super effective filter on the front lens brings all the UV output down to values below that of halogen lamps, which are usually considered totally harmless.

G The DLH400DT Set - no case

Brand-NEW, full warranty – the Best of the Best

including:	Description:
1x DLH400DT	Light head, 400/575 W daylight,
1x DEB400DT	Flicker-free electronic ballast,
1x DPOW400DT	Cable, light head to ballast, 7 m (23 feet)
1x DBD400	Barn door (Series 400)
1x DPLS400	Light shield ring (Series 400)
1x DL400DHR-NB	Metal-halide lamp 400 / 575 W daylight

List Price: 4.334,00 €

Special Price:

1.790,00 €

Brand-NEW, full warranty – the Best of the Best

Utilizing the latest technology, the DEB400DT electronic flicker free ballast was designed to power the DLH400DT, the dedoPAR and the DLH400SDT.

Light weight yet rugged, small yet powerful with every conceivable feature you would want.

- Dimmable (40%)
- Boost position for added light output (575W)
- Active power factor correction
- Over voltage, overload, overheat and short circuit protection
- Automatic input voltage adjustment from 90-260 V AC

Weight	3400g (7.5 lbs)
Wattage	400/575W
Input voltage	Automatic sensing 90-260V AC
Mounting	May be attached to light stand using DEB400H ballast holder (not included)
Safety	Over voltage, overload, overheat and short circuit protection
Indicators	Three LED status indicators (ready, lamp, heat)
Dimming range	40%

Option for DEB400D:

1000 Hz, switchable function for high-speed video recording

Electronic, flicker-free ballast, small, light, robust – cutting edge technology.

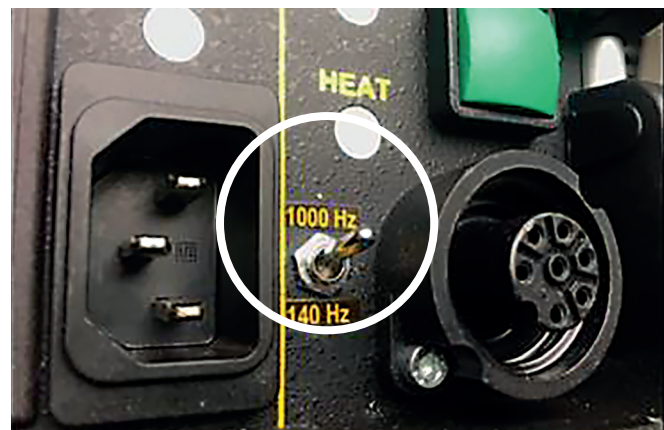

Works with DLH400DT, DEDOPAR and DLH400S-DT and DLH-PA7X2DT soft lights.

Special version of the DEB400DT ballast, suitable for high-speed video shooting. This version is equipped with a switch with which you can alter the standard flicker-free frequency from 140 cycle all the way up to 1000 cycles, which enables high-speed video shooting. Occasionally there

could be noise generated in 1000 cycle function which usually does not worry anybody since high-speed video shooting is usually not associated with sound recording.

Once the high-speed video shooting is done, switch back to normal flicker-free silent mode.

Input range	90-264V AC
Output	special high speed version, output 1,000 c/s. 5 seconds after ignition ballast switches from starting frequency with 140 c/s to high speed operating frequency of 1,000 c/s. Ready to use for flickerfree high-speed recording.
Weight	3.400 kg
Watt	400/575 W
Input voltage	auto-ranging 90-264V AC
Stand Mounting	DEB400H mount allows stand-mounting
Security	protected against over-voltage, overload, overheat and short circuit
Display	LED status indicators (ready, lamp, heat)
Dimming	40%

This switchable version can be ordered with a surcharge of 160,00 Euro

Brand-NEW, full warranty – the Best of the Best

A LIGHT WITH A VERY SPECIAL UNIQUE CHARACTER.

Following the phenomenal success of our original low-voltage light with 12 or 24 V, we expanded the same principle for the next size.

For the original low-voltage lights with 12 or 24 V, we also had separate power supplies with 3 or 4 outputs. For this light, we have a power supply/transformer with similar size, but with only 1 output, usable for input voltages from 100 V all the way to 255 V. The output and intensity is switchable from 3000 to 3200 up to 3400 Kelvin.

With this lighting system, we succeeded to combine the special advantages of our original low-voltage system and transformed them into the next size. This does not only concern the amazing light output, where for example in the spot function with 5.5° exit angle, the light output equals a 650 W dedolight and even more.

I assume, that it will beat any 1000 W traditional light. The main achievement is in the very special light character, which is not obvious to every lighting cameraman, not to every professional. To actually "see" light is a very difficult subject, because light is invisible, we only see the reflection of light, but for the few, that value the very special character of a lighting system and want to use this unique character of light, it is truly and exceptional light.

For example, this lighting system was used by the British Special Effects Cameraman Nigel Stone, who used it for special effects in Harry Potter and many other of his films. Nigel Stone is known for other movies and his special effects work in Charlie and the Chocolate Factory, The Brothers Grimm, Chronicles of Narnia, Total Recall, Cinderella and King Arthur.

Admittedly, a lighting system not for everybody, especially not for those of us, who need to travel with the lightest possible equipment package.

Specifications:

Light head DLH436

Focusing range: 56° to 5.5°

Focus range total: 1:16

Weight: 3400g

Specifications:

Power supply, transformer and control unit D36-1

Output: 36V A/C 400W

Input: adjustable from 100 – 255V A/C

Weight: 6200g

Light head DLH436

Power supply unit

Power supply to light head

Originally, this set was selling for 1.500 € - NEW List Price 1.725 €

Special Price: saving ≈ 60% 690,00 €

We still have a very limited number of such lights available, which we can offer with full warranty, complete light head with power supply, cable and two lamps 400 W, 36V.

Previous pricing information shown in any other dedolight publications no longer valid.

Interesting for fans of halogen quality and character and for those, who value the high precision and the unique character.

Special Price:

158,00 €

The dedolight DLH200SD is a dedicated soft light and offers unique qualities for this type of light source.

- The smaller brother of the DLH400.
- Compact metal halide system.
- Performance and quality as expected from dedolight.
- Dual non-spherical optics.
- Focus range 1:14
- Surprising far reach.
- Two ballasts available, AC and battery ballast.

Many lighting situations demand both focusing and soft light sources at the same time. At dedolight, we feel strongly about designing and recommending totally dedicated light sources.

The focusing dedolight DLH200D with patented double Aspherics² technology and zoom focus movement provides outstanding capabilities.

DLH200D Sundance

Daylight / Tungsten Light Head

The DLH200DT employs our patented double Aspherics² optical system in combination with a zoom focus system. Clearly defined "clean beam", no stray light.

Versatility: All projection attachments and accessories of the dedolight 100/150 classic series are compatible with the DLH200D.

DLH200SD Sundance

Daylight / Tungsten Soft Light

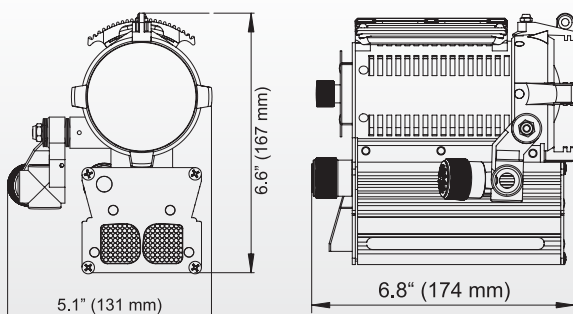

Single function light head exclusively for use with four different types of soft boxes and PanAura[®]/Octodome 3 (DSBOCTS). Since the actual light source is placed in the focal center of the soft box, the light output is approximately two times the light output in comparison to a soft box mounted on the front of a Fresnel light.

A hot spot is normally encountered when using a soft box on a Fresnel light. The light distribution of the DLH200SD with all the mentioned soft boxes is perfectly even and homogenous.

Technical Data: DLH200D

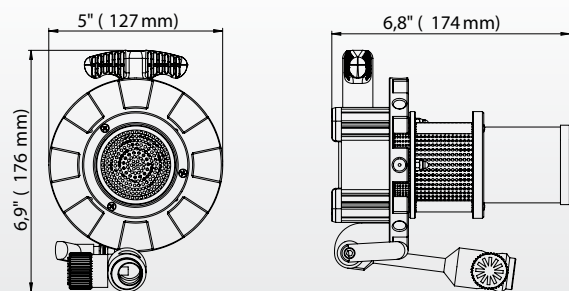

Focus Angle:	48°-4.5°
Focus range:	1 : 14
Weight:	1300g (2.8 lbs)
Lamp:	DL200DHR-NB daylight,
Dimming:	200W-100W
Safety:	IP23 – rainproof
UV:	Double UV Protection,

LOWEST UV CONTENT OF ANY COMPARABLE LIGHT SOURCE.

Technical Data: DLH200SD

Weight:	1500g (3.3 lbs)
Lamp:	DL200DHR-NB daylight,
Dimming:	200W-100W (daylight)
UV:	Double UV protection

Helios B100

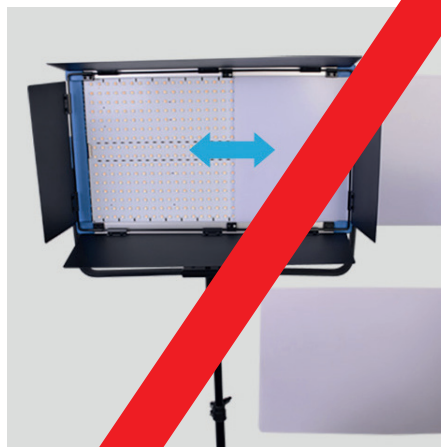

**Studio, Video, dimming bicolor
100W LED panel (3 pcs available)**

Adopted high power LED beam with more than 30,000 hours life time. Also with highly efficiency, energy saving, minimal heat diss characteristics. By swinging one or more of 4-way barn doors leaves into the beam's path, you can selectively light areas of the subject that you want to and keep light from areas that you don't want illuminating. The panel light is ready for worldwide use thanks to 100 to 240 VAC adapter but you can also run in 4x AA V-mount batteries when mains power is unavailable.

Color temperature 3200-5500K adjustable. Built with DMX control system perfectly not only suitable for indoor outdoor video fill light, wedding photography, children's photography, product photography, but also studio, television, film, engineering.

Power	100w *2 W=100W Y=100W =Tungsten 1000W

Special Price:

130,00 €

Tecpro RGBWW LED - Liteflex TP-LF-C-SET - Brand New

CCT:	2900~6500K
CRI:	RA>96 R9>90
LED Source:	40W
Power:	DC in 48V 830mA

List Price: 879,00 €

Special Price:

165,00 €

Tecpro Feather LED - brand NEW

A special, lightweight and handy Bicolor light panel, available in two versions.

The Feather 350 (see image top left) shows a very smooth and even surface.

The Feather 400 (see image top right) shows higher light emission.

Also here, light distribution very smooth, but when looking at the diffuser, the actual active LED light sources are visible.

This can only be disturbing when a reflex in an eye glass becomes visible.

Easy handling and convenient power supply, either with two standard NPF batteries, or with miniature mains power supply.

Code: TP-FEA350-BI Feather Bicolor 350

Tecpro Feather bicolor. LED Pad. 45W. Dual power supply mode: battery-operated or AC power supply

List Price: 298,00 €

Special Price:

FELIONI®

TEC PRO®

Clearance Sale – Best Price Ever!

One generation before last Felloni 2, complete sets (3 lights each) in a soft carrying bag with an unbelievable price

- For a great number of years our Felloni lights have been standard equipment worldwide.
- For the smallest team, for NEWS and documentaries, for lighting rental houses, as well as for complete studio lighting.
- Today, we offer some of the older generations from stock, or refurbished lights at absolutely exceptional prices.
- In order to make it easier for you to choose, please take a good look at the following classifications.

■ Exit Angle

30 degree and 50 degree are universally used.

15 degree exit angle may be better suited as back light, hair light or contour light.

Low profile – only a few of them are left. They feature an exit angle of 45 degree. Possible advantage when installed in a low ceiling.

■ Color Quality

Over the years we have improved the color from second to third generation. Felloni 2 was CRI 85, Felloni 3 has CRI 95. Then we also had the in-between generation of dedocolor, which was the first time we were really absolutely happy with skin tones, and we were offering the optimum color quality possible at that time.

■ Standard and High Output

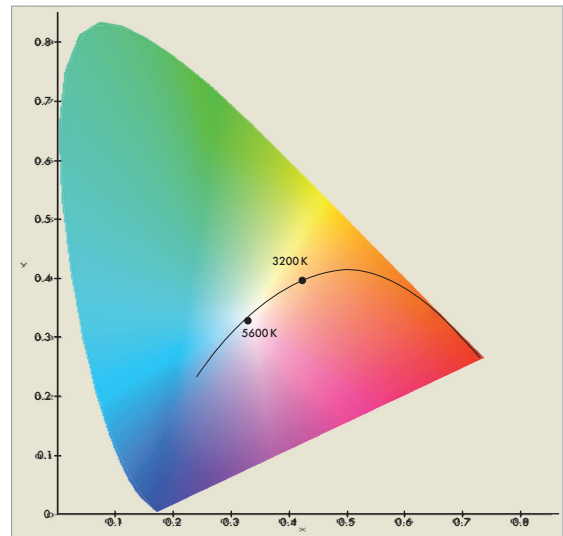

The High Output Fellonis offer about double the light output in comparison to the standard version.

■ Mono-Color

Felloni lights with tungsten light 3200 K (T)

Felloni lights with daylight approx. 5600 K (D)

These mono-color lights offer approximately double the light output in comparison to the bicolor lights.

Mono-Color

High Output

■ Bicolor

Variable color temperature from 3200 K tungsten light to 5600 K daylight.

For use in documentaries of special interest, because it offers you the opportunity to match individual ambient light color situations, where you often find a strange mixture of ambient color temperatures.

For the lighting of talents this also gives you the opportunity to adjust the key light in the optimum way, but also to tune the fill light slightly warmer, to achieve more pleasant skin tones.

For the back light you may want to choose a higher color temperature (colder), which may possibly give you a better separation from the background.

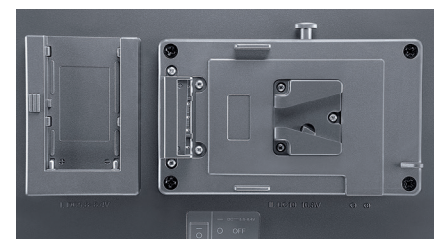

■ DMX

If you remove the dimmer box, you can replace it by a DMX control box (has to be purchased separately).

Not all of the DMX control boxes for the Fellonis work on each of those lights. There are different generations and different software.

Also, it may depend on the kind of control panel that you are using, whether it is a simple one (usually works very well) or a very complex studio version, which may give out not only a DMX signal, but also wants a feedback signal from the light (RDM).

So here, a possible consultation or testing may be required to find the right one – and we may not have many of those left.

■ Dimmability

All Fellonis can be dimmed with not much of noticeable steps.

■ Battery Operation

Simply slide out the power supply for AC, and now slide in your own V-lock lithium battery, approx. 14 V, higher capacity, or buy such a battery from us, called **DS95SI**, which also features a built-in charger.

In general, I would recommend that you buy NEW batteries, because used batteries may fail sooner.

■ Soft Boxes

For the very soft and gentle lighting of persons or objects we offer the **TP-LONI-SBX-42** Soft box (Fits onto all different Fellonis).

TPSC1

List Price: 98,00 €

Special Price:

68,00 €

TPSC3

Freebie – there are also some offers included for sets with 3 Fellonis – and those come with a textile bag free of charge.

Nanlux Evoke 1200

The Evoke 1200 delivers stunning levels of flicker free, controllable light, comparable to that of a 1.8kW PAR or 2.5kW HMI Fresnel.

This has been created around a powerful COB LED source featuring state-of-the-art software exclusively developed by the Nanlux team.

Fully controllable, the EVOKE 1200 supports both wired and wireless control via Nanlink APP, DMX/RDM, Bluetooth and Lumenradio TimoTwo.

The highly accurate user interface, with its 0.1% precision allows for pin-point accuracy in both output and intensity.

Evoke Technical Data:	
Model	Evoke 1200

Z180S - Bicolor

Tecpro Z180S Bicolor - brand NEW

Joining several Z-180 lights, sideways or above each other, provides automatically the control contacts – thus all coupled lights can be dimmed from one control knob whilst with the Bicolor Z-180S version one single other knob controls color temperature for all lights.

Both products (the pure Daylight Z-180 as well as the Bicolor Z-180S) show values with higher output and even light and color distribution over the entire lit field with a near perfect color rendition which surpass most other comparable lights.

color	Z-180 Daylight	Z-180S Bicolor
	17 W	8,5 W to 17 W

Various Lowel Lighting Kits from our own rental

Used Lowel lighting equipment. All used, some heavily used. We have not individually tested each of the items, but we assume, that practically all of those would be fully functional. Some of these kits make sense as stand-alone lighting kits, others could be combined, if you buy two kits and see, what fits your wishes and your needs.

No. 1

Lowel kit softlight with:

- 1 x soft light light head
- 1 x textile cover,
- 2 x lamps inside,
- 1 x lamp extra
- 1 x lighting stand

Appears to have had little use

(list price at B & H (NEW): 399 USD)

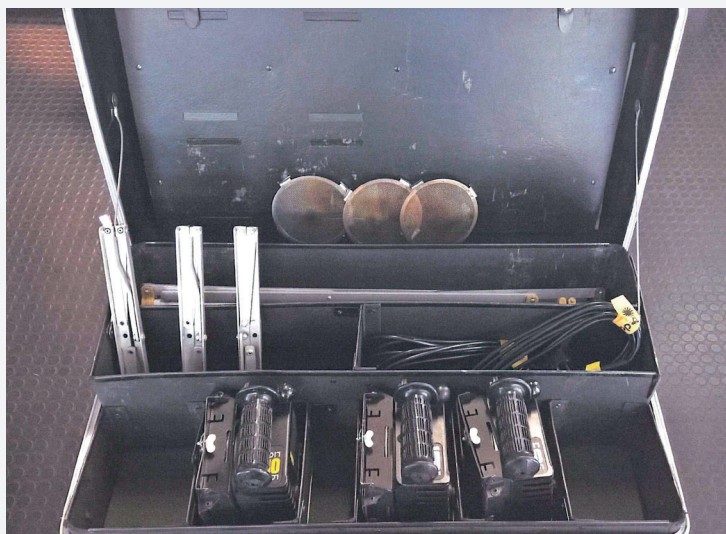

Special Price:

140,00 €

No. 2

Lowel transport case including 3 Omni lights with barn doors

- Collapsible filter holders
- 3 x scrims
- 3 x lighting stands
- 1 cable missing
- Lamps included

Noticeable signs of use

Special Price:

110,00 €

Lowel V-Light 500 W 230 V – NEW

Powerful enough to light a small room yet small enough to fit in a large pocket, the Lowel V-Light can be used as a broad keylight, a fill-light (with an umbrella or diffusion gel), a back-light, or a background light. It's also excellent for copy work.

When fitted with a V1-240/250-volt bulb, this V-Light will emit a beam of 37 footcandles with the barndoors at normal position, and 20 footcandles with the barndoors at 180° position, from a distance of 10' (3m).

This is a 230 volt model. The bulb is available separately. Other bulbs and plug adapters are available.

Total value for all including freight and customs

15.888,96 €

Altogether 3,500 Euro (this is a reduction of 80%; or give us your best offer).

Here, we offer various film cameras, which are all fully functional.

It has to be noted, that the batteries of these cameras, as far as we offer them together with the cameras, are available, but have not been used for a long time and therefore, the battery cells would need to be exchanged, if you wish to operate the camera. We can do that for you, but we have to charge for the upgrade.

If you want such cameras as collector's gems, or for museums, you may most probably not need batteries.

We offer here some absolutely excellent high-speed 16 mm cameras. But we have to point out, that these will need 16 mm film material with double sided perforation, which is not always easily retrievable these days, but we have been informed, that there are still a few sources active.

Some of these cameras are Photosonics Action Master 500 cameras. I've worked myself with them, - it was my best high-speed tool.

Apart from that, we have a complete set of the smallest high-speed film camera, Photosonics 1VN.

In the range of the regular 16 mm cameras, we offer an Éclair NPR camera.

Not for sale, only if you're interested, in my collection, I also have a 35 mm spring driven Zeiss high-speed camera, as well as a Debie Super Parvo color camera, where my colleague Alex says, that this was operated by Charlie Chaplin.

Several Photosonics 4E cameras, as well as 4B Photosonics cameras with viewfinder systems, which we designed and modified.

A Debie high-speed cameras 35 mm, which was used the last time in a Joe Lewis fight 1928.

We also have some original 16 mm Miliken cameras. One of those was used 1972 during the Olympics for Mr. Penn and his absolutely stunning movie about the pole vault, wonderful images, reminding of a Leonardo painting.

I'll stop right here, before I get too emotional.

Until then, - take a look at what we're offering on the next pages and if you still have emotional or even practical ties to this work with traditional film, be it as a collector or as a user, then you will find something special here.

With best regards,

Dedo Weigert

Dedo Weigert Film

PHOTOSONICS 1VN

PHOTOSONICS AM500, 16mm Highspeed Camera

The 1VN is the smallest, lightest, fastest professional motion picture camera ever created.

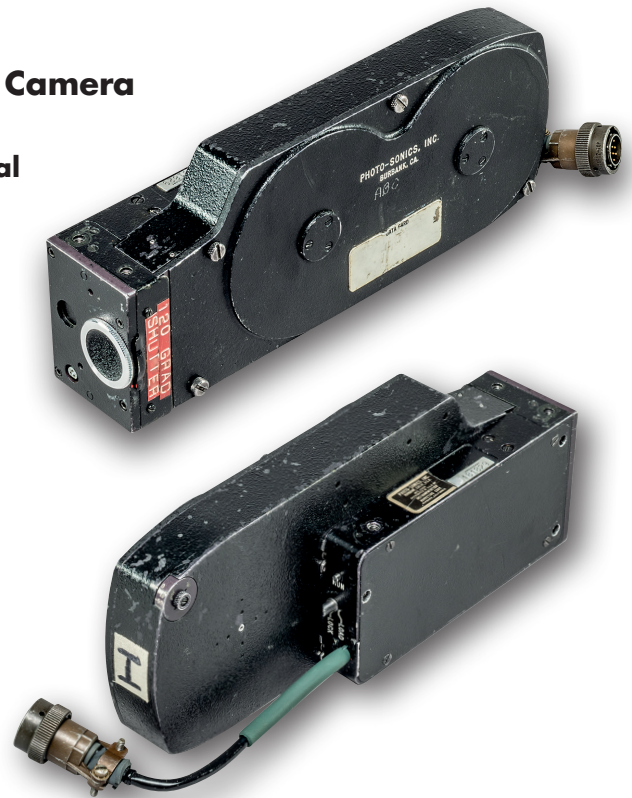

16 MM 1VN (24-200 fps) High Speed Film Camera

Small and lightweight action camera to install on helmet, on cars, bikes, skateboards, skis, airplanes and other brackets

Technical Data:

Speed:	24-200 fps
Movement:	Intermittent, 2 pulldown arms, 2 registration pins
Shutter:	120 degrees (fixed)
Film Spec:	16 mm double perf (2R). 2944 or 3000 pitch on daylight spools
Power:	28V DC
Weight:	3.75 pounds including camera body and loaded 100 feet magazine

The 1VN is a non-reflex camera with a C-type lens mount. Viewing through the lens for line-up purposes is accomplished using a boresight device that attaches to the camera in place of the magazine.

Once the camera is locked in position, the boresight is removed and the magazine is attached. There is no provision for viewing through the lens while the camera is running.

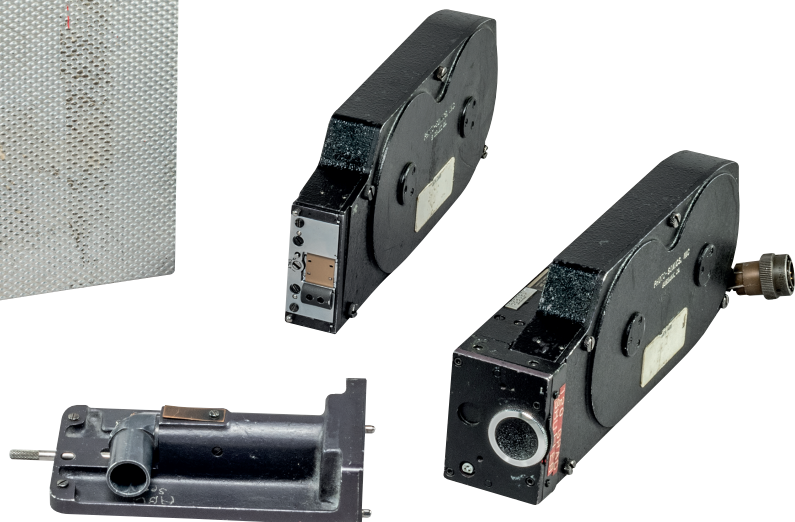

lenses: C-mount:

- Angenieux 5,9 mm, f 1,8 – Euro 650,00
- Bolex-Kern 10 mm, f 1,6 – Euro 350,00

Complete set consists of:

- 1x VN Body
- 2x magazines 30 M (1')
- 1x view finder
- transport case

Complete set:

2.250,00 €

- or your best offer will be considered -

Eclair NPR 16 mm Camera, the revolutionary classic

ECLAIR

Eclair NPR 16 mm Camera

The French Eclair NPR (Noiseless Portable Reflex) 16mm camera, designed by Andre Coutant and introduced in 1963, is the first motion picture camera with a gerat many "16s" to its name. The first of the so-called *cinema verite* motion picture cameras. The first 16mm camera built from ground up to be noiseless without the use of an external blimp.

The first camera to offer factory-installed cableless crystal sync sound shooting. The first professional motion picture camera to offer coaxial magazines.

The first camera ergonomically designed for more comfortable hand holding. The first camera, which could be modified for Super 16.

Complete set consists of:

- 16mm Camera body
- 1x Genieux viewfinder
- 2x Magazine 16mm
- 1x Motor
- 1x Genieux Zoom lens with Cameflex Mount

Complete set:

1.900,00 €

- or your best offer will be considered -

Length:	35cm/ 14 inch (54cm/ 21,5 inch) with zoom mount
Height:	34 cm
Weight:	9,3 kg (20,5 lbs)
Shutter:	180 degrees foxed or adjustable 5 to 180 degrees in 5 degree increments
Exposure Times:	1/48th of a second at 24fps (180 degree shutter)
Filming Speed:	4fps - 48fps max. (depending on motor used)
Battery Voltage Requirements:	10.8 - 13.5v DC (12 v DC nominal)
Current Requirements:	2 amps @ 25 degrees C
Lens Mount:	(1) CA-1 bayonette type and (1) "C" threaded type
Flange Focal Distance:	CA-1 mount = 1.8897", C mount = .690"
Typical Noise Level:	29.5 dbs at 36"

Fries 35R Camera

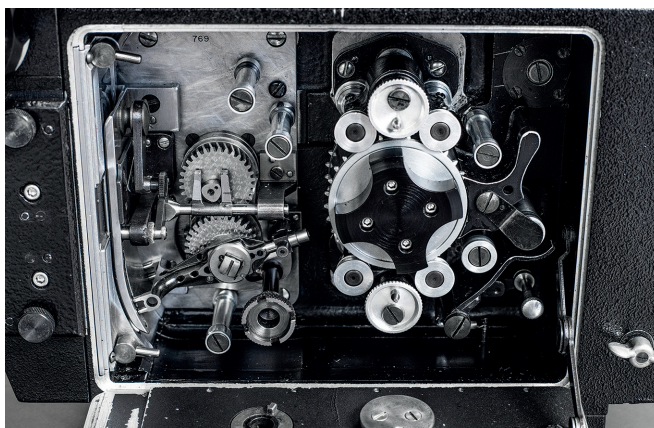

FRIES

The Fries Mitchell 35R camera offered here is based on a Mitchell GC camera. That was the high-speed camera in the conversion by Doug Fries.

The Fries Mitchell 35R camera is one of the most reliable and compact high-speed production cameras available. The dual pin registration and 4-pin pull down mechanism make for the steadiest possible photographic images.

Such cameras were used on many feature projects like Die Hard, Mr. and Mrs. Smith, Battle Los Angeles, The A-Team, Rose Red, Final Destination and many more. This camera features an orientable viewfinder and in our offer is a video tap. 1000 ft (300 m) magazines, as well as 400 ft (120 m) magazines. Interchangeable lens mount. The standard high-speed motor, as well as the Norris single frame motor.

We have literature to back up all the operating instructions, if those are desired.

Norris / Pentax Intervalometer LPC-90 System

Model:	LPC-90 (Light Priority Control)
Color:	Black-Textured Paint
Film Format:	35mm Mitchell Movie-camera
Type:	LPC-90 (Light Priority Control)
Brand:	Norris Film Products

We offer the complete set for Special Price:

5.900,00 €

- Feel free to give us your best offer, which will be considered -

State: used only one or twice, NEW condition

Blackmagicdesign

Blackmagic design Production Camera 4K PL including Tilta cage grip und support rods

- Super 35 mm sized image sensor with global shutter and a PL lens mount
- The camera is capable of recording ultra HD 4K (3840 x 2160) and 1080 p Video, using 10 bit Apple ProRes recording 422

Special Price:

890,00 €

The most compact professional S3D system with exceptional properties

Key Features:

- Extremely compact and lightweight stereo 3D system
- Simply ONE camera with ONE lens assembly with two optical units in one single housing, ONE sensor, ONE recording medium
- Result: No camera alignment, no synchronization needed, images are automatically synchronized
- No differences between the two recorded images regarding color, luminance and scale
- Images are free of optical distortions and artefacts
- No problems with reflections or mirror effects, as may be found with mirror rigs
- Fast camera setup, fast work on the set
- Uncompressed onboard RAW recording (Phantom Cine RAW)
- High-speed recording up to 300 fps in S3D mode with a resolution of 4096x1152
- Depth of field equals 35mm recording
- Interocular distance of the optical units is variable for the definition of the image plane
- Includes a 3D calculator for fast and easy control of optimum depth of field and image plane
- Use of matte box and filters, identical with 2D shooting
- No limitations by weather, no disturbance by dust, rain, snow and dirt particles as you may often find with mirror rigs
- Compact system, ideally suited for shooting in confined spaces
- Easy handling on cranes - as hand-held camera
- Use on a Steadicam
- Camera body weighs 5.5kg
- Ideal also to be used as a B-camera

- Any offer from you will be considered -

Phantom Remote Control Unit

Phantom - Accessories

The Phantom Remote Control Unit is a useful 5" companion. This small, lightweight, portable device offers both control of the Phantom high speed cameras and work as additional onboard monitor.

The RCU supports the entire high speed camera workflow. Set up the camera, trigger the shot, check the camera using the LCD - screen, define with In- and Out-points the in and out of the contents and save the result on the CineMag (CineFlash).

The 5" TFT touch screen technology allows you to control a camera with a tap of your finger. A scroll/jog dial gives you a fast (and fast!) way to change many settings or to scroll through a recorded cine.

The optional industrial Bluetooth connectivity gives you the freedom to control the camera wirelessly. (Miro only via cable).

- Handset, compact and lightweight (17.75 cm x 10.2 cm, 740g)
- Control most Phantom cameras from RCU
- With integrated video monitor (5")

- Any offer from you will be considered -

Tel +49 (0)89 - 356 16 01 / info@dedoweigerfilm.de / www.dedoweigerfilm.de

ATOMOS

Samurai Blade monitor recorder

Atomos Samurai Blade is designed as a compact field recorder that can be attached directly to a camera or camera rig.

The device can record HD signals via HD-SDI, optionally in ProRes or DNxHD. The Samurai Blade stores data on standard 2.5-inch hard drives like those found in a laptop computer. In order to ensure reliable recording even in the event of strong vibrations, Atomos recommends the use of 2.5-inch SSD memories.

The Samurai Blade can record up to 12 digital audio channels, which are included as embedded audio in the HD-SDI signal. Analog audio can be recorded on 2 channels via a mini jack plug. A robust aluminum housing enables the recorder to be used even under harsh environmental conditions. The display integrated in the Samurai Blade has a resolution of 1280 x 720, with a screen diagonal of 5 inches.

A viewing angle of 179 degrees and a brightness of 400 nit make it possible to assess the subject to be recorded at any time. In addition to the peaking and zebra functions, there are other control tools that can be used to assess the image signal. For example, a vectorscope, a waveform monitor or an RGB parade display can be shown in the display of the Samurai Blade.

Atomos Samurai Blade stores video signals with a quantization of 10 bits with a color sampling of 4: 2: 2. The common HD resolutions up to a maximum of 1080i60 are supported.

Dimensions 153x87x48mm, weight without battery and HDD 345 grams

Input voltage: 6.2VDC to 16.8VDC

Power consumption: 3.3Watt (monitor only) 6.8Watt (monitor, play, recording)

Power supply via NP batteries or D-Tap

Original price approx. 600,00 € to 700,00 €

Special Price:

150,00 €

transvideo

Transvideo Cinemonitor 6" Evolution SBL super bright Transvideo Monitor HD6SB

This monitor was specially developed for camera support systems such as Steadicam, Artemis and the like. With a max. brightness of over 1000 nits, the ALMCD panel can still display the image even in full sunlight due to specially coated front glass. Extensive measuring devices and analysis tools on board.

Waveform monitor, focus helper, 1:1 pixel zoom, exposure control via histogram and limits setting with false colors, framing, image flip, artificial horizon, freely configurable tally, audio display, time code display, iCooke lens reader make this monitor the reference class for the camera operator. Sturdy die-cast aluminum housing, passive cooling without fan and without ventilation slots/holes, protect against moisture and make this monitor the ideal tool for the sometimes rough everyday life on set. USB input for software updates, tally out.

Input voltage:	10-36VDC via 4 pin XLR
Power consumption:	14 watts
Supported formats:	1080p/1080i/1080psf/720p/SD SDI 525-626/NTSC/PAL/SECAM
HD SDI In/Out:	via BNC / Compositit/Component input via 8 pin Lemo.
Contrast ratio:	600:1
viewing angle:	+/- 80° H, +60/-80°V
Dimension:	195x168x60mm, weight 1,4 kg.
Working temperature range:	-20°+55°C
Storage temperature range:	-40°+80°C

In sturdy hard pelicase with accessories.

Both monitors offered here HD6 and HD8 are several years old, but fully functional. List Price: 2.700,00 €

Special Price: **980,00 €**

TEC PRO[®] Monitor

PrimaVista 7

TP-MPV7

Extreme lightweight portable monitor. Allows viewing in broadcast quality, in color or black&white, whatever the situation demands. LED backlight of monitor provides high life expectancy and needs less current than traditional LCD monitors. Two video inputs and one audio input. Allows mixed (BNC, RCA) and HDMI connections. Monitor can be used with latest HD video cameras and 'high performance' DSLR cameras. Includes NTSC/PAL decoder with 4:3 and 16:9 image resolution. Monitor can be fed by one lithium battery. One adapter for Sony NPF batteries included.

Further adapters for Canon BP9 and Panasonic CGA available optionally. Includes foldable light shield and plastic ball joint.

Specification:

Screen Diagonal: 7.0" (diagonal)
 Display Size: 154 x 86 mm (6.1 x 3.4")
 Ratio: 16:9 / 4:3 selectable
 Resolution: 800 x 480 px
 Color Depth: 24-bit (16,777,216 colors)
 Brightness: 250 cd/m2
 Contrast Dynamic: 500:1
 Video Formats:
 FBAS – NTSC/PAL; HDMI – 480i/p,
 576i/p, 720i/p, 1080i/p
 Input Voltage: 5.8 – 18.8 V DC
 Loudspeaker Output: 1 W max.
 Video In-/Outputs via BNC connector:
 AV1 – FBAS BNC connector (75 ohm)
 AV2 – FBAS RCA connector (75 ohm)
 HDMI Input: HDMI (type a) socket
 Audio In-/Output: RCA socket (75 ohm)
 Weight: 0.7 kg without battery
 Size: 175 x 33 x 127 mm

Power Grip

Brand-NEW, full warranty

Suction mount for cameras with built-in vacuum pump, holding pressure over 400 kp. Mounting can also be on slightly curved surfaces.

A HOLDING DEVICE THAT REALLY HOLDS.

Since the pump creates a true vacuum, the Power Grip offers a suction and holding power like no other system. We have attached the Power Grip on racing cars, even at speeds of 300 km/h.

We have mounted a camera on a Cessna airplane, underneath the wing.

SAFETY CONTROL

The Power Grip shows whether the vacuum is still fully existing and will be kept continuously. If it happens that the Power Grip is mounted to a porous surface, this will be shown clearly in as much as the pump tube will start moving out, and a red mark will become visible.

The adjustable base plate allows angles from 90 degree to one side, and 60 degree to the other side.

The multiple holes don't only provide a serious saving in weight, but also many different variations for attachment.

TECHNICAL DATA

Suction mount diameter 25cm

Weight: 2.7 kg

Angled plate: 1.1 kg

CASE – With purchase of the complete system – free of charge

F16PG Power Grip

Kenyon gyro KS 8x8 Kit

KS-8x8 Gyro Kit Gyro, Inverter, Battery Belt Pack and 6 hr. charger WITH CARRYING CASE

Weighs 10.4 lbs. (4.717 kg.)

Outside dimensions: 7.64" (19.406 cm) x 7.64" (19.406 cm)

3.7" (9.398 cm) high without accessories

Draws 4.6 amps (@12 volts) at start up dropping to 2.5amps in 10 minutes - 115 VAC 400 Hz

Can run up to 2 hours on fully charged Ken Lab battery pack

Stabilizes equipment in the 9-20 lb. (4.1-9.2 kg) range

The weight of this gyro is better suited for use with a mount or a bungee cord setup, but hand holding is possible.

A useful optional accessory we offer is called the D-Ring mount plate, a thin round plate that attaches to the gyro and has 16 threaded holes to attach D-rings so the gyro can be suspended by bungee cords.

The kit contains the gyro with 5 foot straight cord, 12 volt inverter, 12 volt sealed lead acid battery in belt pouch, battery charger in a iM2400 Storm Case. The battery that is included will run the gyro for approximately 1.5 to 2 hours.

These accessories are available in 58mm screw-mount version that threads directly on to camcorders featuring a 58mm front thread. Century also offers an assortment of Step Rings to accommodate front lens diameters from 43-58mm. Ideal for JVC GY-DV300U, JYHD10U, Sony DCR-TRV900, DSR-PD100, VX2100/VX2000, DSR-PD170/PD150, Canon GL2 & GL1. Here's the tool for capturing a wider angle of view while maintaining full zoom capabilities. The .65X Wide Angle Converter attaches to the front of your video zoom lens for 35% more coverage when set to wide angle, telephoto, or anywhere in between.

ODS-FEWA-58 Ultra Fisheye 0.3X

The Century Precision Optics DS-FEWA-58 0.3x Ultra Fish-eye Adapter Lens gives you an extreme fish-eye effect and a high degree of barrel distortion. It exaggerates depth by pulling nearby objects closer and causing distant objects to recede into the background. Ideal for capturing extreme action shots, the DS-FEWA-58 gives you a wide viewing angle of 130,° (180° diagonally).

Magnification: 0.3x, Zoom Through:

Yes - partial, Rear Mount Diameter 58mm, Front Mount Diameter 112mm

Note: Will not work on Canon GL-1, Sony VX-2000 or PD-150.

Century Broadcast IF lens accessories

OWA-8XLC-00 Wide angle converter incl. 85 mm adapter

This Century Precision Optics OWA-8XLC-00 is a clamp-on wide angle converter lens compatible with Canon and Fujinon 18x, 19x and 20x broadcast lenses. It features a wide angle coefficient of 0.8x, which delivers a 20% wider angle than the stock lens. When added to an 8.5-119mm lens the converter, it alters the focal length range to 7-98mm. This is especially advantageous when shooting in tight spaces. This lens has full zoom through capability. An 85mm clamp-on ring is included.

List Price: 881,00 €

Special Price:

179,00 €

OTC-16LC-85 Tele converter 1.6X incl. 85 mm adapter

This Century Precision Optics 1.6x Telephoto Converter Lens is for any lens with an outside diameter of 85mm. The converter clamps to the front of the lens. The 1.6X HR Teleconverter instantly shifts the focal length range in the telephoto direction without light loss. This converter lens offers zoom through capability.

List Price: 881,00 €

Special Price:

179,00 €

OWA-FESU-RD Fisheye adapter incl. 80 mm adapter

This Century Precision Optics WA-FESU-RD is a fisheye adapter lens for Fujinon 16x lens on the JVC GYHD100/110/200/250. This lens gets you the widest view possible, with extreme barrel distortion. It exaggerates depth, pulling nearby objects closer, and causing distant objects to recede into the background. Has a magnification factor of 0.55X offering a super spherical fisheye effect.

List Price: 1.168,00 €

Special Price:

230,00 €

OWA-8XCV-00 Wide Converter (without clamp mount)

The .8x Wide Converter attaches quickly to the front of a zoom lens, effectively shortening its focal length while maintaining full zoom capabilities. Attach the .8x to the front of a lens for 20% more coverage when set to wide angle, telephoto or anywhere in between. For example, when added to an 8.5-119mm lens, the .8x Wide Converter alters the focal range to 7-98mm. This can be especially advantageous when shooting in confined quarters.

High-class endoscope, length 90 cm

Specification:

Diameter of the endoscope pipe:	19 mm
Length of the pure endoscope:	74 cm
Overall length without camera mount:	90 cm

Diameter of input connector for light guide: 9 mm

The endoscope includes a fixed wide-angle lens.

There is a thread which allows the attachment of various Century universal camera mounts.

Those are available for video cameras as well as film cameras.

This endoscope was originally manufactured by French company Efer. The system can be used with a fibre light guide and an external light source (not included). The focusing device and camera adapter was manufactured by us.

The thread for the camera adapter has a diameter of 56.6 mm. At this moment, we're still looking, whether we can find any of the camera adapters, that we previously manufactured. This device can be supplied incl. a sturdy aluminium transport case.
